

Assignment 1: Build a Todo List Application

Instructions:

- Create a web-based todo list application using HTML, CSS, and JavaScript.
- The application should allow users to add, edit, and delete tasks.
- Implement a feature to mark tasks as completed.
- Ensure the application is responsive and works on different screen sizes.

Submission:

- Submit the completed project as a ZIP file containing all source code.
- Include a README file with instructions on how to run the application.
- Deadline: March 31, 2025
